DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-26 are rejected under 35 U.S.C. § 103 as being unpatentable over **Stern et al.** (Hereinafter "Stern") US Patent Application No. 2002/0052928, in view of **Mills** US Patent No. 6,466,940.

As to claim 1, Stern teaches a method of providing links to remotely located information in a network of remotely connected computers [see the abstract and fig. 1], said method comprising the steps of

- a) associating a shorthand link to each of a plurality of uniform resource locators (URLs) [internal link as function of keywords and an unique identifier for the Web site, 0055, 0057-0067 on page 3];
- b) logging associated shorthand links in a registry database [a links-to-visit table, see the abstract; a list of internal links and selecting from remaining internal links as function of keywords, 0055 of page 3];

Application/Control Number: 09/659,261 Page 3

Art Unit: 2175

d) for each found said shorthand link, fetching said associated URL [the target URL associated with a link, 0029 of page 2].

However, Stern does not explicitly teach searching said registry database for a shorthand link associated with an URL responsive to selection of said shorthand link. Mills teaches searching said registry database for a shorthand link associated with an URL responsive to selection of said shorthand link [ab; col. 9, lines 40 to col. 10, lines 33].

Therefore, it would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to have modified Stern's system wherein the internal links of a Web site are collected and recorded in a links-to-visit table provided thereof would have incorporated the teachings of Mills especially the methodology of searching a database for a shorthand link (or web pages) associated with an URL; the motivation being to expand and enhance the versatility of Stern's system by allowing a user to search one or more of the addresses of the document retrieved from the search engines.

As to claim 2, Stern and Mills teach the invention substantially as claimed. Stern further teaches

- I) requesting registration of a URL [table "links to visit", 16 of fig. 3]:
- ii) selecting an unused key [inherent in the system]: and
- iii) pairing said selected key with said URL as a shorthand link [the target URL associated with a link, 0029 of page 2]..

As to claim 3, Stern and Mills teach the invention substantially as claimed. Stern further teaches that each key-URL, pair is entered in the registry database [16 of fig. 3].

Application/Control Number: 09/659,261

Art Unit: 2175

As to claim 4, Stern and Mills teach the invention substantially as claimed. Stern further

teaches that said fetched associated URL is presented to a requestor, said requestor having

selected said shorthand link [0029 of pages 1 and 2].

As to claim 5, Stern and Mills teach the invention substantially as claimed. Stern further

teaches said fetched associated URL is presented to a requestor, said requestor having provided

the paired key of the key URL pair [0029 of pages 1, 2; 16 of fig. 3].

As to claim 6, Stern and Mills teach the invention substantially as claimed. Stern further

teaches that an error message is returned whenever a requestor provides a key not paired with a

URL [0099-0106 of page 5].

As to claim 7, Stern and Mills teach the invention substantially as claimed. Stern further

teaches that when a provided key not associated with a URL is identified as corresponding to a

key in a key-URL pair, presenting the identified URL to said requester [unique identifiers or web

site signatures, see the abstract].

As to claims 8-13, all limitations of these claims have been rejected in the analysis of

claims 1-7 above, and these claims have been rejected on that basis.

As to claims 14-26, Stern and Mills teach the invention substantially as claimed as

specified in claims 1-13 above, with the exception of computer readable program code means.

However, since the method is processed in the computer system, the feature of having a

computer readable program code means is inherently in the system in order to perform such

functions and convert information from one form to another.

1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuy Pardo, whose telephone number is (703) 305-1091. The examiner can normally be reached Monday through Thursday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici, can be reached at (703) 305-3830. The fax phone number for the organization where this application or proceeding is assigned are as follows:

(703) 872-9306 (Official Communication) and/or:

(703) 746-5616 (Use this Fax#, only after approval by Examiner, for "INFORMAL" or "Draft" communication. Examiner may request that a formal/amendment be faxed directly to then on occasions).

Any inquiry of a general nature of relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3900.

2. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 308-9051, (for formal communications intended for entry)

Or:

(703) 308-5359, (for informal or draft communications, please label

"PROPOSED" or "DRAFT")

Art Unit: 2175

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Thuy Pardo April 01, 2004
